DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 14-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. It is not clear if the motor and the power are elements of this invention.

Claims 14-15 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 14, it is not clear if the motor is an element of the invention. In claim 15, it is not clear as to what the power is in reference to. In claim 17, it isn't clear if the motor is an element of the invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-15 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Inoue.

Inoue discloses in figures 1-5 a control circuit comprising a high-efficiency pulse width modulated speed control circuit 61, an integrated microphone 11, an audio interactive circuit 21, power (is derived from an electrical source) and (claim 18 is interpreted as intended use).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Inoue.

Inoue discloses in figures 1-5 a control circuit, substantially as claimed.

However, Inoue doesn't disclose the circuit between the control circuit and the motor being wireless. It is old and well known in the art that the connection between a motor and a control circuit could be wireless through using either one of the means of transmission recited in claim 17. The wireless control would eliminate the cost of wires being connected between the control circuit and the motor.

Allowable Subject Matter

Claim 16 is would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Talge and Ito, each discloses a control circuit.
